BlackBerry Messenger (BBM) was initially developed for BlackBerry devices but gained popularity across various platforms due to its secure and instant messaging capabilities. It allows users to send text messages, voice notes, images, videos, and even participate in group chats. Its emphasis on privacy and real-time communication made it a favorite among many users worldwide.

Compatibility with Nokia 700

The Nokia 700 runs on Symbian Anna, an OS that, while less common today, still supports several popular messaging apps, including BBM Messenger.
