Sample Assessment Questions and Answers for MEI Stats 1

Question 1: Identify the best graph to compare the number of students in different courses.

Answer:

A bar chart is most appropriate because it clearly displays comparisons between categories, such as different courses, with distinct bars representing each group.

Question 2: Given a histogram showing the distribution of ages in a population, interpret the main features of the data.

Answer:

The histogram indicates that most individuals are between age 20 and 30, with a peak around age 25. The distribution is slightly right-skewed, suggesting a larger number of younger adults. The range spans from 18 to 60, with few older individuals.

Question 3: The table shows the number of hours students spend on homework each week. How would you summarize this data?

Answer:

Calculate the measures of central tendency (mean, median) to understand the typical amount of homework. Also, assess the spread using the range or standard deviation. For example, if the mean is 10 hours, with a median of 9, most students spend around 9-10 hours weekly.

Sample Corrected Answer Analysis

Let?s analyze a sample question and its ideal answer to illustrate best practices.

Question:

The table below shows the number of books read by students in a month. Create a suitable histogram, then interpret the distribution.

| Number of Books | Number of Students |

|---|---|

| 0-2 | 5 |

| 3-5 | 12 |

| 6-8 | 8 |

| 9-11 | 3 |

| 12-14 | 2 |

Ideal Answer Approach:

- Constructing the Histogram:
- Use the class intervals as the bins on the x-axis: 0-2, 3-5, 6-8, 9-11, 12-14
- Plot the frequency (number of students) on the y-axis
- Bars should be proportional to frequencies with labels and a descriptive title like "Number of Books Read by Students in a Month"

- Interpreting the Distribution:
- The distribution appears right-skewed, with most students reading 3-5 books
- Fewer students read very few or many books
- The mode is in the 3-5 books category
- Outliers are minimal, but the 12-14 category has the lowest frequency

Answer Summary:

The histogram shows that the majority of students read between 3 and 5 books per month, indicating a central clustering around this range. The skewness suggests that while some students read very few or quite a few books, most tend to read a moderate number.
