Deep Dive: Sample Questions and Detailed Explanations

To illustrate effective answering, here are some detailed responses to typical Novanet questions.

Q1: What are the main causes of desertification, and how can it be prevented?

Answer:

Desertification is primarily caused by a combination of natural and human factors. Human activities such as overgrazing, deforestation, improper irrigation, and overcultivation lead to soil degradation. Climate change exacerbates arid conditions through increased temperatures and irregular rainfall. Prevention strategies include implementing sustainable land management practices, afforestation, controlled grazing, efficient water use, and adopting conservation agriculture. International efforts like the UN Convention to Combat Desertification (UNCCD) promote awareness and coordinated action.

Q2: Explain how urbanization influences environmental quality.

Answer:

Urbanization often leads to increased pollution due to vehicular emissions, industrial activities, and waste generation. It results in the depletion of green spaces, loss of biodiversity, and strain on water and sanitation systems. Air and water pollution compromise public health, while increased energy consumption raises greenhouse gas emissions. To mitigate these impacts, cities must adopt sustainable urban planning, promote green infrastructure, enforce pollution control measures, and encourage public transportation.
