Sample Physical Science Questions and Answers

Question 1: Properties of Matter

Q: What is the difference between a physical change and a chemical change?

A: A physical change alters the form or appearance of a substance without changing its composition (e.g., melting ice). A chemical change results in the formation of a new substance with different properties (e.g., burning wood).

Question 2: Newton?s Laws of Motion

Q: According to Newton?s second law, what is the relationship between force, mass, and acceleration?

A: Force equals mass times acceleration (F = ma). This means that the force applied to an object is directly proportional to its mass and the acceleration produced.

Question 3: Energy Conservation

Q: When a roller coaster reaches the top of a hill, what types of energy does it have?

A: It has maximum potential energy due to its height and some kinetic energy if it is moving. As it descends, potential energy converts into kinetic energy.
